

United States Department of State

Washington, D.C. 20520

MAY 29 2002

ARMR Services Corporation
8301 Arlington Blvd., Suite 206
Fairfax, VA 22031

Attention: Mr. Paul Roland

Dear Mr. Roland:

Based upon your request, a technical representative of the Department of State (DOS) witnessed the vehicle crash test at MGA Wisconsin Operations on May 10, 2002 and has since evaluated the MGA Test Report C02C3-007. The ARMR Services Corporation crash gate Model 730 has been determined to meet the DOS certification criteria for vehicle barriers. Under the provisions of SD-STD-02.01, *Specification For Vehicle Crash Test of Perimeter Barriers and Gates*, dated April 1985, the Model 730 has been certified as a K4/L2 barrier which will stop a 15,000 pound vehicle traveling at 30 mph with no greater than 20 feet of penetration.

The Model 730 will be placed on the DOS list of certified equipment that is available for use by architects and planners. Your product still has to compete with other bidding manufacturers who are certified with the same classification. We cannot guarantee that your product will be chosen by architects that design the facilities.

Thank you for your interest and endeavors in protecting our personnel and facilities overseas.

Sincerely yours,

John M. Eustace, Jr.
Acting Director
Physical Security Division
Bureau of Diplomatic Security
